PROFILE

Computer Science undergraduate, graduating in 2027, with practical experience building Flutter applications, deep learning models, and generative AI pipelines. Currently a Flutter and AI/ML intern at Big Brains, seeking entry-level opportunities to apply strong programming, problem-solving, and software development skills.

EDUCATION

University of Management and Technology (UMT), Lahore 2023 - Present
Bachelor of Science in Computer Science | Expected graduation: 2027

Punjab Group of Colleges 2022 - 2023
Intermediate in Computer Science (ICS)

TECHNICAL SKILLS

Languages: Python, Dart, C++, JavaScript, SQL, HTML/CSS

Mobile & Backend: Flutter, GetX, Supabase, FastAPI, MySQL, REST APIs

AI & Data: TensorFlow, Keras, scikit-learn, Pandas, NumPy, CNNs, Gradio, Streamlit

Tools & Foundations: Git/GitHub, VS Code, Jupyter, AWS S3 (basic), OOP, Data Structures & Algorithms

SELECTED PROJECTS

Coffee Shop - Mobile Ordering App | [GitHub](#)

Flutter, Dart, GetX, Supabase

- Built catalog search, product customization, cart and demo checkout flows, light/dark themes, and PDF receipts.
- Integrated Supabase authentication, persistent shopping data, server-validated pricing, and role-protected dashboards for private testing; validated core flows with 125 automated tests.

Student Dropout Risk Prediction | [GitHub](#)

Python, scikit-learn, Pandas, Gradio

- Built a Gradio prediction prototype using an existing 36-feature Logistic Regression model; reproduced 94.21% notebook test accuracy (evaluation has documented preprocessing leakage).
- Verified preprocessing reconstruction across 3,630 records to near machine precision; added input validation, SHA-256 artifact checks, and seven automated tests.

Traffic Sign Recognition Using CNN

Python, TensorFlow, Keras

- Developed a CNN to classify 43 traffic sign classes in the GTSRB dataset; applied CLAHE preprocessing and data augmentation, then evaluated performance under simulated lighting and weather conditions.

ToonScript - AI Manga Generation Pipeline

Python, FastAPI, Ollama, Stable Diffusion

- Combined Qwen2.5 story generation with Stable Diffusion 1.5 and LoRAs for panel artwork; used InsightFace and IP-Adapter for character consistency, with a FastAPI backend and HTML interface.

INTERNSHIP

Flutter Development & AI/ML Intern | Big Brains Aug 2026 - Present

Remote | Lahore, Pakistan

- Developing modular Flutter interfaces with state management and Git workflows; built the student dropout prediction prototype during the AI/ML internship.

RELEVANT COURSEWORK

Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Machine Learning, Deep Learning, Cloud Computing, Compiler Construction, Human-Computer Interaction

LANGUAGES

English (Intermediate) | Urdu (Native)
